

Coding & Solution

Date	04 July 2026
Team ID	
Project Name	A Comprehensive Measure of Well Being
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	[Paste your GitHub / GitLab or hosted link here]
Programming Language(s)	Python, HTML, CSS, JavaScript
Framework(s) Used	Flask, Bootstrap
Key Features Implemented	Data preprocessing and cleaning, Machine Learning model for HDI prediction, User-Friendly flask web interface
Setup / Run Instructions	Install the required libraries using pip install -r requirements.txt. Ensure the dataset(hdi.csv) and trained model (HDI.pkl)

Code Quality Checklist

S.N o	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	No

Additional Notes / Comments:

The project follows a modular structure using python and flask. Meaningful variable names and basic documentation improve readability and maintainability. The application successfully predicts the Human Development Index (HDI) based on user input.
